Introduction to Generative AI with AWS Project Documentation Report

Visit [UDACITY Introduction to Generative AI with AWS Project Documentation Report](#) to make a copy of this document.

Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: 1. Financial 2. Healthcare 3. IT	IT
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	"inputs": "Outline the key aspects of ubiquitous computing from a data management perspective." Generated text: '\nUbiquitous computing is a relatively new field that has been gaining popularity in recent years. It is a term that refers to the use of technology to make computing devices and systems available and accessible to people in everyday life. This technology can be used to make computing devices and systems more convenient, efficient'
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?	"inputs": "outline the key aspects of ubiquitous computing from a data management perspective." Generated text: The main focus is on the design and implementation of data management solutions for ubiquitous computing environments. The book also discusses the design and implementation of novel data management solutions for the Internet of Things.

	The book is designed for researchers and practitioners in data management, distributed systems, and ubiquitous
